

# SHINGLE CREEK WATERSHED MANAGEMENT COMMISSION

Effective July 1, 1989, the Shingle Creek Watershed Management Commission (SCWMC) is required by law (M.S. 473.877) to regulate surface water appropriation from public waters within the Shingle Creek Watershed. Affected waters are either (1) a public water basin or wetland that is less than 500 acres; or (2) a protected watercourse that has a drainage area of less than 50 square miles.

The SCWMC has authorized member cities to act as their agent in processing permit applications and issuing permits for surface water appropriation. Conditional permits for withdrawal of surface waters from DNR Protected Waters and Wetlands may be issued from your City Engineer in accordance with the Standards established by the SCWMC.

If you withdraw less than 10,000 gallons/day or 1 million gallons/year of surface water for a non-essential use, a permit is required from the SCWMC. Non-essential uses, include but are not limited to lawn sprinkling, car washing, and golf course and park irrigation.

To apply for a permit, please complete the section below and submit to the City Engineer in your city.

Note: For water appropriation in excess of 10,000 gallons/day or 1 million gallons/year, a permit is required from the Minnesota Department of Natural Resources, Division of Waters. Telephone No. 296-7523.
