

REQUEST FOR COUNCIL ACTION

MEETING DATE: May 2, 2022
PREPARED BY: Brandon Stenglein, P.E., Project Engineer
AGENDA ITEM: Fountains Area Improvements, Proj. No. 16-02 – overnight working hours

PREVIOUS ACTIONS:

The Council previously awarded a contract to Valley Paving, Inc. for the Fountains Area Improvements Project No. 16-02 in the amount of \$568,902.00. The project consists of the modifications of the intersection of Fountains Way, and Fountains Drive to improve traffic flow.

RECOMMENDED COUNCIL ACTION:

Motion to approve overnight working hours for the watermain modification work at the intersection of Fountains Way and Fountains Drive for the Fountains Area Improvements Project No. 16-02.

COMMENTS:

Work is scheduled to commence for the Fountains Area Improvements Project No. 16-02 the week of May 2, 2022. The first piece of this project is to relocate a water hydrant out of the new road alignment. In order to perform this work, water will need to be shut down in this area putting multiple businesses out of water service. To mitigate this disruption in water service, the contractor has requested to perform this work during early morning hours so as to be back in service before these businesses open. The extended working hours would be needed for only one day, but the contractor is requesting a window of May 3rd to May 13th to perform this work. Schedule is largely dependent on the removal of road restrictions which is set by MnDOT as well as weather.
