the drone policy they are trying to implement is a huge invasion of privacy i do not think government agencies should be allowed to use these in any area where people reside. it is completely unnecessary.

Will any UAS employed by the MGPD be used to monitor wireless communications?

Will any UAS employed by MGPD be equipped with a stingray/cell site simulator/IMSI catcher or similar devices?

Has MGPD signed or will it ever sign a non-disclosure agreement with a provider of stingray/cell site simulator/IMSI catcher or similar devices?

Thanks.

Hello,

Jordan here from Maverick Drone Systems. We noticed your interest in an Unmanned System. We specialize in all things unmanned and are based out of Savage, MN. If you have any questions on how to get the program started, we can help you with that.

Let me know if you have any questions.

LEAVE US A GOOGLE OR FACEBOOK REVIEW!

As a citizen of Maple Grove for 13 years, I would like to weigh in on the use of UAS. I love this community, and want it to remain safe. At the same time, I do believe that we need to be able to feel like we can be private citizens. I don't believe that UAS will make us safer than they will invade our privacy. I would feel less comfortable knowing that a UAS that could be outside my window or recording my conversations and taken out of context. I am law abiding and a good citizen of our community; and if this is concerning to me, then I know it would likely concern my neighbors and friends in the community.

Sincerely,
Holly Friker

I encourage the city to NOT approve the use of drones in areas near homes. I live in an apartment overlooking Central Park. Someone was operating a drone in Central Park, and it was an invasion of my privacy, as he operated it near the windows of these apartments. They have no purpose in populated areas.

Thank you for your consideration.
