Subject: Project No. 2020-19, Fernbrook Lane/Territorial Road Intersection Improvements

Dear Resident/Property Owner:

As you may be aware, the intersection at Fernbrook Lane and Territorial Road will be getting reconstructed with a new roundabout being installed.

During construction, traffic at this intersection will be limited or detoured depending on the direction you are travelling. This project is laid out in three phases. Phase 1 will be general site preparation and temporary pavement which will not require that traffic be detoured or restricted. Phase 2 and 3 will require restricted traffic movements and detours. Included in this mailing is the overall site layout as well as a map explaining the detours for each movement at the intersection through each phase.

You can go to the City of Maple Grove website to sign up for updates pertaining to the project. See below link.
